Remarks

NXP has released two patches on Feb 9th 2023 on NXP's GitHub repository “nxp-imx/linux-imx” to fix the problem. These patches will roll back the license to “GPL v2.0 only” for all affected source files and make them compliant with Linux kernel licensing scheme. The patches also remove author's email ID from the code comments. The following are the patches accessible by customers on GitHub to remedy the problem.

1. LF-8313-1: Update License to GPL-2.0
2. LF-8313-2: Update License to GPL-2.0

NEXT STEPS FOR ALL AFFECTED CUSTOMERS

NXP urges all affected customers to immediately apply the patches to their respective repos based on “5.15.71_2.2.0” BSP release and rebuild images for their specific systems to ensure the license contamination is remedied. NXP has already published new prebuilt images/binary demo files based on “5.15.71_2.2.0” release for all supported NXP EVKs. Customers using EVKs for evaluation can download the new images/binaries from the following link and continue to their evaluation.
