

TI-CTI-20 Adapter

Overview

The TI-CTI-20 Adapter has a standard 20-pin 0.1" target connector that allows to connect J-Links or Flashers to eval boards with TI MCUs that are equipped with a TI CTI-20 connector.

The TI-CTI-20 Adapter adapts from the standard 20-pin 0.1" target connector to TI CTI-20 connector. This adapter allows to connect J-Link or Flasher to eval boards with TI MCUs that are equipped with a TI CTI-20 connector, e.g. the AM335x evaluation module. As can be seen in the image below, the key on pin 6 ensures that the adapter can not be connected the wrong way.

Pin out

TMS	1 ● ● 2	TRST
TDI	3 ● ● 4	GND
VTref	5 ● 6	NC
TDO	7 ● ● 8	GND
RTCK	9 ● ● 10	GND
