Product Series Involved

62 and 65 Relays

Type of Change

Major

Key Change

Discontinuation of Silver Cadmium Oxide (AgCdO2) contact material

Scope

In meeting new RoHS regulations, Silver Cadmium Oxide (AgCdO2) contacts will no longer be available after 12/01/2023. Moving ahead for the 62 and 65 Series relays Finder will use Silver Tin Oxide (AgSnO2) contact material. Nothing changes with respect to electrical ratings/mechanical construction or agency approvals. Any questions please contact your Finder team members.

Numbers Obsoleting AgCdO2 AgCdO2 (Silver Cadmium Oxide)

Good resistance to contact welding.
