Digilent Distributors/Resellers

1) Description

Digilent has decided to EOL (End of Life) the Analog Discovery 2 and the associated Analog Discovery 2 bundle kits. The 5 below part numbers are affected by this EOL. Effective immediately, we are no longer accepting distributor/reseller orders for these products.

Part Number	Description
410-321	Analog Discovery 2
471-019	Ham Radio Workbench Bundle
471-027	Ultimate Analog Discovery 2 Bundle
240-120	Analog Discovery 2 Student Bundle
240-123	Analog Discovery 2 Pro Bundle

The Analog Discovery 3 is the recommended replacement for the Analog Discovery 2 and the associated part numbers are listed below.

Part Number	Description
410-415	Analog Discovery 3
471-060	Analog Discovery 3 Pro Bundle

2) FAQ

1. What is the communication to customers?
We are discontinuing the Analog Discovery 2 and replacing it with the recently released Analog Discovery 3.
2. What is the difference between the Analog Discovery 2 and the Analog Discovery 3?
The Analog Discovery 3 offers double the buffer size for data acquisition, new filters, faster system clocks, integrated digital loopback, more potent power supplies, and more. For a full comparison, please check out the blog post detailing the changes at <https://digilent.com/blog/whats-different-with-the-analog-discovery-3/>
