

Product Change Notification

November 30, 2023

Dear Valued Customer,

This notice is to inform you of changes to our EPIC® connectors product line.

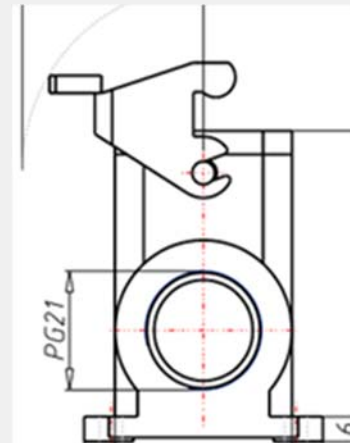

Our connectors currently utilize a mix of fixed and removable levers. In an effort to harmonize our EPIC® product line we are converting our fixed lever connectors to a removable lever version. The removable lever is a proven design that has been in use globally for more than a decade.

There will be no change in form, fit, or function. EPIC® connectors will retain their same intermateability. There are several advantages of the removable lever. It utilizes a spring loaded mechanism that provides smooth locking and tactile feedback. Removable levers are replaceable in the event they are damaged.
