Subject: Similar Epoxy material for 272/273/274/278/279 series Micro fuses

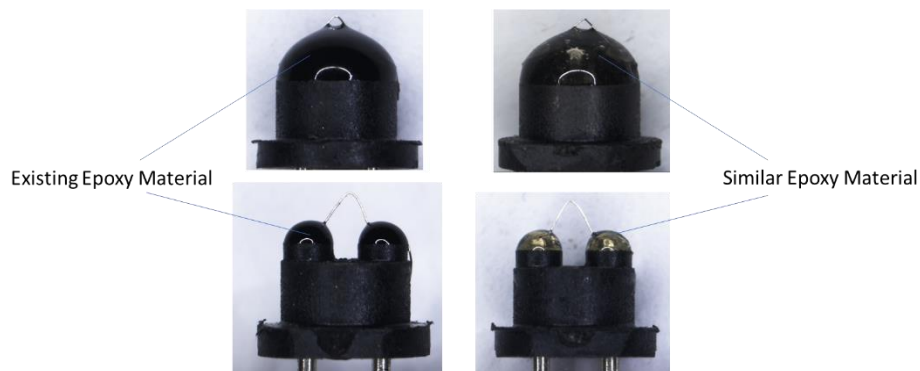

With regards to the above reference, Littelfuse would like to inform you that we would be using a similar Epoxy material to the existing Epoxy for 272/273/274/278/279 series Micro fuses.

The existing Epoxy material has been discontinued and due to assurance of supply, Littelfuse has qualified a similar Epoxy material which has comparable electrical properties to the existing material.

This change will have no impact to the electrical performance of the fuses. There are no changes to the specs as defined in the datasheet, no changes in the form, fit and function of the fuses. Please see attached for validation report.

There is no change to the part number. We will use date code to distinguish the fuses.

Please refer to the below for the existing and similar Epoxy material.

Part numbers affected are shown on the next pages.

We would do the running change in production from Jun.24th, 2024 onwards

Please let us know should you have further queries.

Best Regards;

Style Liu
